

Provider Communication

Subject: Hospitals, Nursing Facilities and Physicians Revised DMA-613	Priority: High
Date: October 4, 2004	Message ID: ACSBNR-10042004-1

Dear Provider:

Effective October 1, 2004, the Department of Community Health, Division of Medical Assistance Plans will implement the revised DMA-613 form (PASRR Level I). Regulations require that any individual in need of a nursing home level of care must be screened for indicators of mental illness, mental retardation, developmental disability or related conditions. The DMA-613 has been revised to include additional categorical determinations that exclude individuals requiring nursing home care from this screening process.

You may access this form by downloading it from the GHP website at www.ghp.georgia.gov, 'Forms' link page or you may complete the form electronically via the Web portal.

For questions regarding this correspondence contact Nell Moton-Kapple, PASRR Program Specialist, at 404-657-7211.

The Department of Community Health appreciates your continued participation in and support of the Georgia Medicaid and PeachCare for Kids Program.

Sincerely,

Department of Community Health
